PRODUCT DESCRIPTION

Stainless steel Spiral applicators, with a film width of 180, 230 or 320 mm, are round bars, tightly wound with stainless steel wire. The diameter of the wire, in the wound form, regulates the thickness of the coating. The Spiral applicator is ideal for application of (thin) film of thin materials such as sheet of paper or plastic. Also to be used with automatic film applicators.

This type of spiral bar coater fits on the TQC / TQC Sheen Automatic Film Applicator Models, sold from 2012 and on. If you have an older model TQC Automatic Film Applicator, another type of spiral film applicator (starting with article code VF…. ) has to be used. Please contact us for availability.

BUSINESS

Paint laboratory

STANDARDS

Look up the appropriate standard for a correct execution of the test.

SCOPE OF SUPPLY

The Spiral Bar coater comes in a tube-type case.

SPECIFICATIONS

Material: Stainless steel
Available in: sizes from 4 to 300 µm
Straightness: < 50 µm

SPECIAL CARE

• Though robust in design, this instrument is precision-machined. Never drop it or knock it over.
• Always clean the instrument after use.
• Only use non-corrosive solvents to clean the instrument. Use a soft, non-abrasive cloth to dry it.
• Never clean the instrument by any mechanical means such as a wire brush or abrasive paper. This may cause, just like the use of aggressive cleaning agents, permanent damage.
• When stored for a long period of time, wrap the instrument in oil paper.
• We recommend annual calibration.
